

GLASS BEADS

CHF 2.48

Description

Glass beads are round, mineral and iron-free.

This makes them very suitable for machining stainless steel and aluminum parts.

The round shape gently cleans the workpiece.

With glass beads you can create attractive surface structures.

Special

This quality can only be used for medical applications after prior individual tests.

The beads are unevenly shaped and can also be oval.

However, they are well suited for all other areas of application.

application

- Gentle cleaning
 - Matting
 - Rust removal
 - Compacting surfaces.
 - For matt silk surfaces.
-
