

GLASS GRANULES

CHF 1.65

Description

Angular grain shape. Iron free. Although the rust is well removed, the granules hardly attack the materials underneath. Also suitable for subsequent painting.

PRODUCT DESCRIPTION

Description

Angular grain shape. Iron free. Although the rust is well removed, the granules hardly attack the materials underneath. Also suitable for subsequent painting.

Application

Cleaning sensitive surfaces such as Molds and tools, removing paints and varnishes.

Because it is free of iron, it is also suitable for blasting work on high-alloy steels, special steels, non-ferrous metals and wood.

Industry sectors

Apparatus and container construction, stainless steel and steel construction, vehicle construction, corrosion protection, shipyard industry, facade, natural stone and concrete renovation, graffiti removal and wood beams.
