CHF 21'438.30

Technical specifications

Basket diameter	600 mm
Usable height	400 mm
Max. Loading weight	200 kg
Spray pressure	3 bar

PRODUCT DESCRIPTION

The combi cleaning system L101 HP was specially developed for cleaning new and repair parts on an aqueous basis.

In this system, components can be cleaned automatically and manually. In addition to automatic cleaning using a 3-sided spray register, the system can also be used with a high-pressure gun (up to max. 60 bar, adjustable). The system also has an air blow gun for blowing off the components. There is a large viewing window on the front of the lid and LED interior lighting on the top of the lid. A candle filter is provided in the pressure line of the high-pressure pump, which continuously filters the medium.
