

GLOGAR PARTS WASHER L210 E

CHF 43'481.40

Technical specifications

Basket diameter	1500 x 1500 mm
Usable height	1000 mm
Max. Loading weight	700 kg
Spray pressure	4,7 bar

PRODUCT DESCRIPTION

With the spray cleaning system L210 E, Glogar offers the ideal cleaning system when large-volume parts with strong to extreme impurities have to be degreased / cleaned.

The L210 E spray cleaning system is already completely made of stainless steel as standard, with a pneumatic lift door, a loading trolley or loading table in front of the system and a steam vapor extraction system. Automatic replenishment of fresh water is also part of the standard equipment of these efficient rotary basin washers. Of course, this system is not only available as a single-chamber spray cleaning system, but also as a 2-tank system (L212 E) or 3-tank system.

Technical specifications

Basket diameter	1500 x 1500 mm
Usable height	1000 mm
Max. Loading weight	700 kg
Spray pressure	4,7 bar

Standard equipment for front loaders
