CHF 7'984.20

The ideal parts washing / degreasing system for the automotive and workshop area.

Technical specifications

Basket diameter	910 mm
Usable height	520 mm
Max. Loading weight	150 kg

PRODUCT DESCRIPTION

The GLOGAR L901 FP is the ideal parts washing / degreasing system for the automotive and workshop sector.

The stable and robust design of the parts washing / degreasing system guarantees a long service life, even in continuous use over many years. The entire housing of the hot water parts cleaning system and the cleaning tank of the degreasing system are made of stainless steel (1.4301). The optimal basket drive of the hot water parts cleaning system is operated by means of a gear motor.

Level monitoring and dry-running protection of the heating element are also included in the standard equipment of the parts washing system. Likewise basket drive and suction filter.
