

GLOGAR PARTS WASHING MACHINE L102

CHF 10'942.80

Technical specifications

Basket diameter	910 mm
Usable height	520 mm
Max. Loading weight	200 kg
Spray pressure	3 bar

PRODUCT DESCRIPTION

The L102 parts washing machine was specially developed for cleaning new and repair parts on an aqueous basis.

The highly efficient stainless steel pumps and the 3-sided spray register in double design with the stainless steel wide-jet nozzles guarantee excellent cleaning results when the mesh basket rotates. The parts cleaning system L102 is ideal as a cost-effective solution for the final or intermediate cleaning of components at the workplace in the manufacturing or repair area. This type of system is characterized by a motor-operated basket drive, a tank cover with stainless steel fine filters and a stainless steel body.
