

GLOGAR PARTS WASHING MACHINE L122

CHF 13'401.80

Technical specifications

Basket diameter	1150 mm
Usable height	700 mm
Max. Loading weight	350 kg
Spray pressure	3 bar

PRODUCT DESCRIPTION

The L122 parts washing machine was specially developed for cleaning new and repair parts on an aqueous basis.

The highly efficient stainless steel pumps and the 3-sided spray register in double execution with the stainless steel wide jet nozzles guarantee an excellent cleaning result when the mesh basket rotates. The parts cleaning system L122 is ideal as a cost-effective solution for the final or intermediate cleaning of components at the workplace in the manufacturing or repair area. This type of system is characterized by a motor-operated basket drive, a tank cover with stainless steel fine filters and a stainless steel body.
