

## WHITE CORUNDUM

**CHF 3.90 - CHF 4.35**

### Description

White corundum belongs to the group of electrical corundums. They are produced by melting alumina in an electric arc furnace. It is iron-free and of the highest purity. It has a high degree of hardness (MOHS 9) is extremely tough. It can be used in both dry blasting (pressure blasting / injector blasting) and wet blasting.

### Application

- Cleaning metallic surfaces (abrasive)
  - Removal of paint
  - Removing rust and descaling metallic surfaces
  - Matting surfaces
  - Preparation for protective layer application
  - Roughening of metallic surfaces before coating
  - Deburring
  - Sandblasting of stone
  - For non-slip industrial floors
-
